## RISE- Research Internships in Science and Engineering

Good research relies on cooperation, and international teamwork is becoming increasingly important. This means that scientists and engineers with international experience are in growing demand in both business and academia. That is why DAAD (German Academic Exchange Service) has created unique opportunities for students from Germany interested in gaining serious research experience worldwide. RISE Worldwide matches them with researchers all over the world for a summer research internship at universities and research institutions.

This is to certify that

**Dr. Indrajit Roy**  
**Principal Investigator (PI)**  
**Department of Civil & Environmental Engineering**  
**Birla Institute of Technology, Mesra**

is an internship provider for the **RISE worldwide** program by DAAD to host German Bachelor students as research assistants for the summer at Birla Institute.

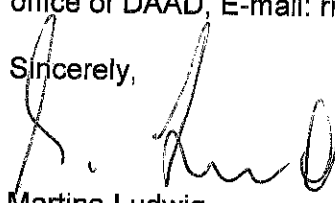

Dr. Indrajit Roy will host Vera-Marie Andrieu from July 8<sup>th</sup> to September 1<sup>st</sup>, 2019.

Vera-Marie Andrieu will receive a scholarship by DAAD for living expenses and travel. We appreciate the opportunity that Dr. Indrajit Roy provides to our grantee.

DAAD is a central agency of the institutions of higher education in the Federal Republic of Germany which organizes international academic exchange programs. Scholarship recipients have been chosen in a national competition by a selection committee.

If you have questions about the above internship, please feel free to call or write to the head office of DAAD, E-mail: [rise-ww@daad.de](mailto:rise-ww@daad.de)

Sincerely,

  
Martina Ludwig
