Blockchain: THE INDIA STRATEGY

Part 1 January 2020

The first part of the first part strategy document has focused on the regulatory and governance aspects of the blockchain ecosystem. The second part of the strategy, to be released in coming weeks, will focus on recommendations to establish India as a vibrant blockchain ecosystem. The suggested recommendations include:

1. Regulatory and policy considerations for evolving a vibrant blockchain ecosystem
2. IndiaChain: creation of a national infrastructure for deployment of blockchain solutions with inbuilt fabric, identity platform and incentive platform.
3. India as blockchain hub: promotion of research and development in blockchain, in addition to focus on skilling of workforce and students
4. Procurement process for government agencies to adopt blockchain solutions
5. Pegged stable coin for Indian Rupee for seamless exchange for blockchain solutions. This may be in conjunction with the need for re-evaluating cryptocurrencies.
6. Crypto currencies for India: Does India need a cryptocurrency / ICO market? What could be the possible contours for facilitation of ICO market in India that assuages all the regulatory concerns?
