

# Incubation Centre

## BIT Patna

BIT Patna is the one of the premier Incubation centre from, 2017 according to Bihar Startup policy-2017-2022. During that period, we had tried to revolutionize concept of startup among students, researchers and students. Further we can say that an echo system has been established between academia and industries for the same. To put all aforementioned on the heart of people, students and youth, related events have been organized in our campus including one week Training program for pre-Incubation startups in **2019** having participated by approx 33 start-up /candidates across the state. Further in **2020** BIT Patna had organized 1st National seminar on Pragmatic role of Technological Innovation in Startups. On that seminar approx more than 100 participants had presented their ideas related with startups and innovations across the country. In that seminar we had also called several eminent speakers from IIT, IIM, NIT, and Central University of sought Bihar as well as from other premier Institutions. To continue this boosting technique for startups and researchers again BIT Patna had organized 2<sup>nd</sup> National seminar on Pragmatic role of Technological Innovation in startups in **2023** with the help of Dept, of Industries, Govt. of Bihar which covers several research fields and innovations like agriculture, human and plant diseases detection, Battle field management, protection from fire, minimizing flood effect, renewable energy, utilization of solar energy etc. Further I have a plan to organize the 3<sup>rd</sup> National seminar on Pragmatic role of Technological Innovation in startups in Feb **2025**. By knowing BIT Patna potentiality in this track govt. of Bihar has signed MoU with BIT Patna as per Bihar start-up policy for 2022-2027. In this year BIT is incubating **18** start-ups assigned by the Dept. of Industries Govt of Bihar. All start-ups are doing very well in their own fields. Someone is flourishing their business, some are developing prototypes, and someone is selling their products. Now approx **100** employments (part time/fulltime) have been generated by them.

Our goal is to mentored Start-ups in such a way that they might be in position to grow their business not only in, Bihar but across the India and further across the world. Our one Start-up(Amplitech automation system private limited, Mr. Prem Kumar) is doing his business in same pattern.
