Workshop on Computer Networks with Hands-on Sessions
Date -22nd March 2024

The objective of the short-term course on "Computer Networking and Practical Aspects" is to equip participants with comprehensive knowledge and practical skills in the field of computer networking. By focusing on both theoretical concepts and hands-on applications, the course aims to empower learners to understand, implement, and troubleshoot various networking technologies and protocols effectively.

This short-term course on "Computer Networking and Practical Aspects" was a specialized program designed to cater to the growing demand for skilled professionals in the field of networking. Whether students were looking to enhance their academic qualifications or seeking to upskill in this rapidly evolving domain, this course offered an ideal opportunity to broaden their knowledge and expertise.

"Computer Networking and Practical Aspects"

This short-term course is aimed towards exposing the students towards the practical aspects of Computer Networks which includes:

- How to setup a small area computer network.
- Diagnosing the network.
- Exposure to Hardware equipment like L-2 Switches, L-3 Switches, Routers, Access points etc.
- Some commonly used Software tools.

Date - 22/3/24
Time – 1.30 pm to 5.30 pm
Venue – C-12 and CL-2
Faculty Coordinator – Dr. Alok Pandey,
Assistant Professor,
CSE Department,
B.I.T. Jaipur Campus.

Structured to accommodate learners of all levels, from beginners with no prior experience in networking to seasoned professionals looking to deepen their understanding of advanced concepts, the course provided comprehensive coverage of essential topics. By the end of the program, participants had a solid foundation in computer networking principles and practical skills that were directly applicable to their academic pursuits or professional careers.
