AMSCO2K24

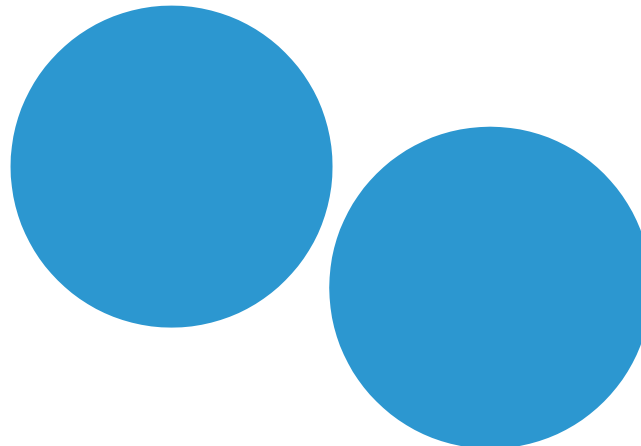

On-line International Conferences on Ancient Mathematics and Science for Computing (AMSCO) is the World's First Online International Conference Series on Ancient Mathematics and Sciences. The goal of conference series is to bring out the use of modern technology and computing to realize the dimensions of AMSCO. The first conference AMSCO2K16 of this series and subsequent Conferences were successfully completed with a team of enthusiastic young researchers and professionals exploring the modern technology to exchange their views on-line. Following its success and encouragement from the participants, we are glad to present Fifth On-line International Conferences on Ancient Mathematics and Science for Computing (AMSCO2K20). Among other objectives of the conference is to provide an opportunity to the young researchers to express their ideas and interact with professionals from interdisciplinary areas through paper presentations.

BIT MESRA

Established in 1955 by the visionary industrialist and philanthropist Mr. B. M. Birla, BIT Mesra was founded with a clear vision to offer the young minds a space, where their imagination could take wings and their ideas fruition. BIT Mesra has been engaged in nurturing minds through a rich heritage of academic excellence. Essentially a hub of bustling student activities, the beautiful campus has been a second-home to thousands of students in their journey to challenge the times. Established in 1955 by visionary-industrialist Mr. B.M. Birla, it is today one of the most premier engineering destinations in India. The Jharkhand Government, willing to spread the academic excellence of BIT further across the state, made a request to the institute to establish an Extension centre at Deoghar. BIT responded wholeheartedly and subsequently, a MoU was signed between the Institute and the Government of Jharkhand. Thus, the Deoghar Extension Centre of BIT commenced functioning in October 2007 as the eighth of the Institute's campuses within India offering undergraduate programs in different streams of engineering and at present it also becomes another technical varsity of region, pioneering many present state-of-the-art of research in technology commissioning and implementation.

AMSCO

The Ancient Mathematics & Science for Computing aims to provide a platform for individuals and teams from academic/industrial backgrounds to gather and share their intellect for application of mathematics and sciences to interdisciplinary work for the betterment of society. The dimensions of the AMSCO are 'Old is Gold' as its depth and 'Mathematics is the mother of all Sciences' as its breadth has aspired through different academic and research activities. As a part of its activities, AMSCO promotes online conference series and is enthusiastically looking forward to meeting researchers from all over the globe.

CAMSR

Council of Ancient Mathematics and Scientific Research (CAMSR) provide a platform put together by a group of professionals for specific swarm of the institutions/ labs/ researchers/ scientists/ academicians/ students/ industry with R&D persons interested in exploring modern technology for research in ancient knowledge of Mathematics and Science. CAMSR is exploring new innovations by initiating knowledge sharing and interdisciplinary research under the umbrella of AMSCO and IMSR.

MGES JOURNALS

Maya Global Education Society is an emerging confluence of academicians to cater to challenges in the educational and research domain in the post-pandemic world. Inclusiveness is our core philosophy and readership, authenticity, and innovation are three elements of our operating philosophy. MGES is by academicians and for academicians. Our core activity is developing an online research-based education and training system that will reach all parts of society irrespective of their economic status.

AREAS OF FOCUS

Technical articles/research papers are cordially invited from the faculties, researchers, students, and policy makers on following themes and subthemes:

- o Ancient, Modern, and Applied Mathematics.
- o Physical, Chemical, and Biological Sciences.
- o Application of Mathematics and Sciences.
- o Modern topics of Science and Technology.
- o Computing techniques with all Computational and Simulation work and many more.
- o Any innovative idea which is fruitful to the society.

PUBLICATION

All accepted abstracts will be published in international peer reviewed, cross ref, ISSN journals. Selected technical articles will be published in UGC/SCI/SCOPUS Indexed

AMSCO TIME LINE

- o Paper Submission:
Abstract :30th October 2024
Notification: Within 05 days
- o Camera-ready Paper:30th November 2024
- o Early bird Registration:
30th September 2024
