

TECHVIBES 2016

The Annual Techno-Management fest **TECHVIBES-2016** of Birla Institute of Technology, Mesra, Jaipur Campus is being organized on **15th -16th March** 2016 on the theme **Retro-Future** with an aim to create a platform for bustling student activities, engaging and practically realizing their knowledge and ideas.

Since its foundation, the fest has maintained the status of being a well balanced and profound events. It has received a great reception from the participants, society and the media and is growing leaps and bounds with passing years.

This year **TECHVIBES-2016** holds the steady promise of its stellar predecessors. The fest is a complete combo of strong passion, technological skills, energy, knowledge, fun and the show of tremendous growth over the years.

TECHVIBES-2016 will host a plethora of **Events** like **Exhibitions, Lectures, Workshops, Hackathon, Robotics, Startup India, Quiz, Creative Events** etc. This fest is being organized in collaboration with Computer Society of India (CSI) and The Institute of Electronics and Telecommunication Engineers (IETE).

Fest's theme of this year: Retro-Future builds on ideas of futurism, but the latter term functions differently in several different contexts. In avant-garde artistic, literary and design circles, Futurism is a long-standing and well established term.

Retro-futurism is first and foremost based on modern but changing notions of "the future". As Guffey notes, retro-futurism is "a recent neologism," but it "builds on futurists' fevered visions of space colonies with flying cars, robotic servants, and interstellar travel on display there where futurists took their promise for granted, retro-futurism emerged as a more skeptical reaction to these dreams.
